PUMPS

# Moving What Matters

## An Introduction to Atlantic Pumps

**ATLANTIC  
PUMPS**

**Our purpose is to be the most responsive pump company globally — delivering fast, reliable solutions when our customers need them most.**

## About Us

We move what matters, no matter what. We take the time to find out what really matters to you.

We provide the products and expertise to help you move water, sludge, slurries and digestate efficiently with a lower whole life cost.

## Delivering Value

By taking a clear-cut, customer first approach, we drive sustainability through solutions that are designed to meet stringent industry demands.

We take the time to understand what really matters to you.

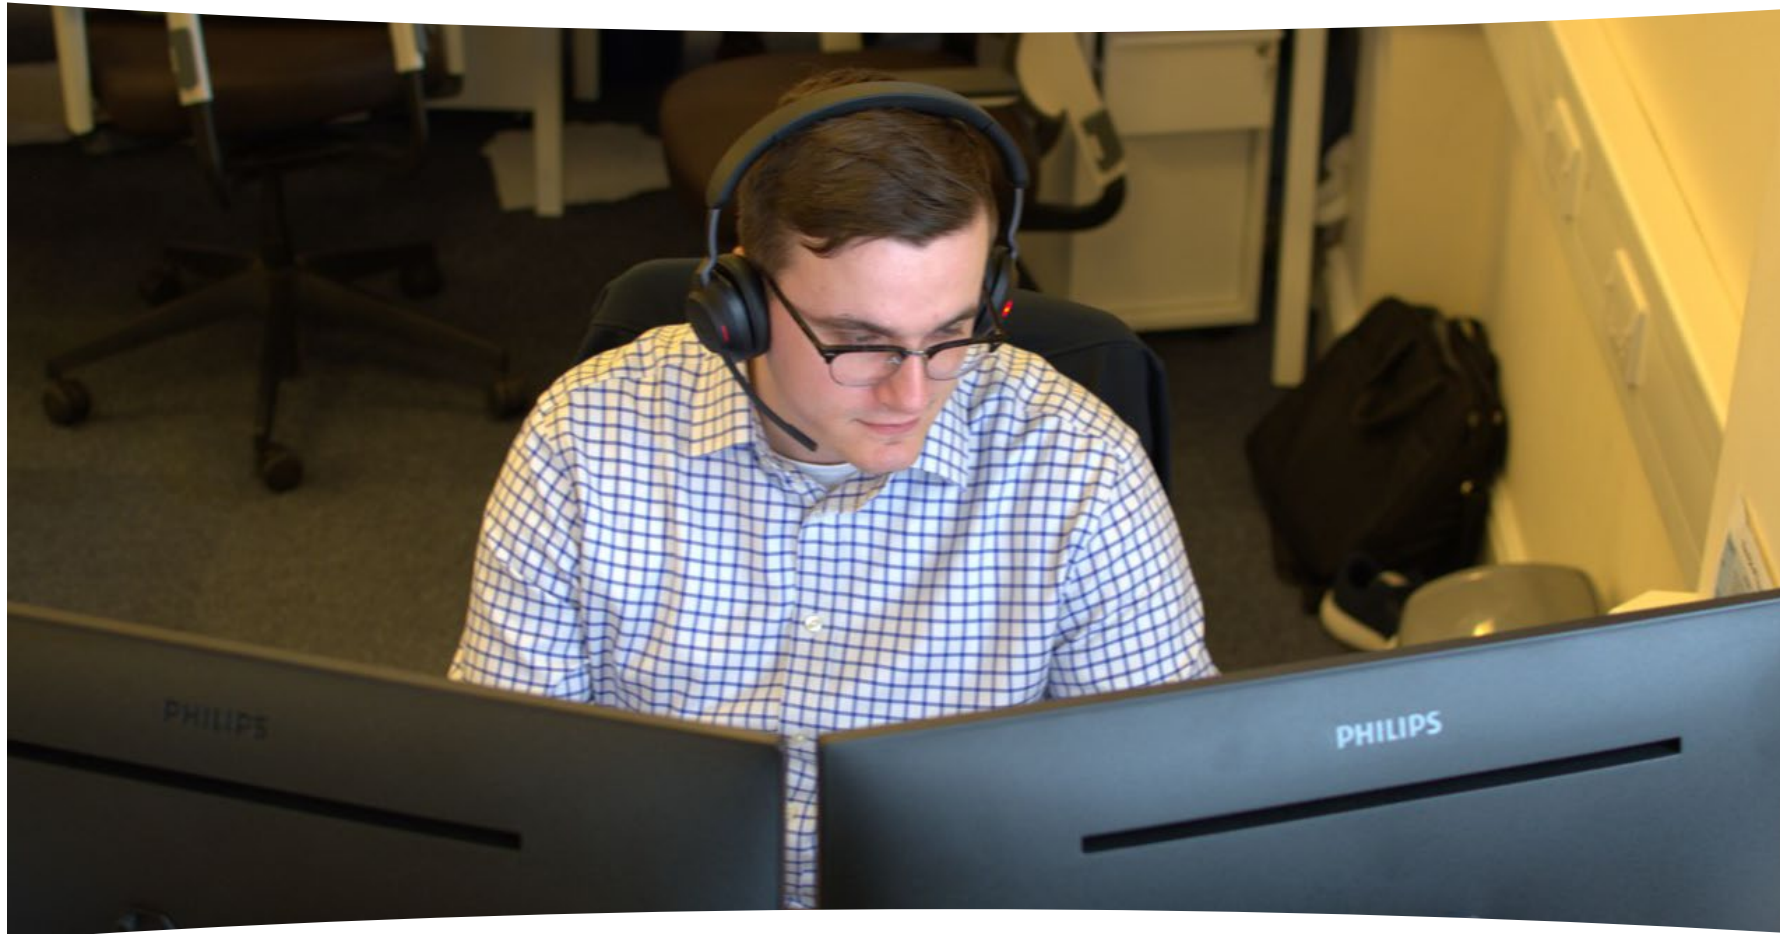

We provide options to the end user to reduce operating costs by offering pumps that are robust and more reliable which in turn reduces your lifetime costs in spare parts and downtime.

## Our Unique Approach

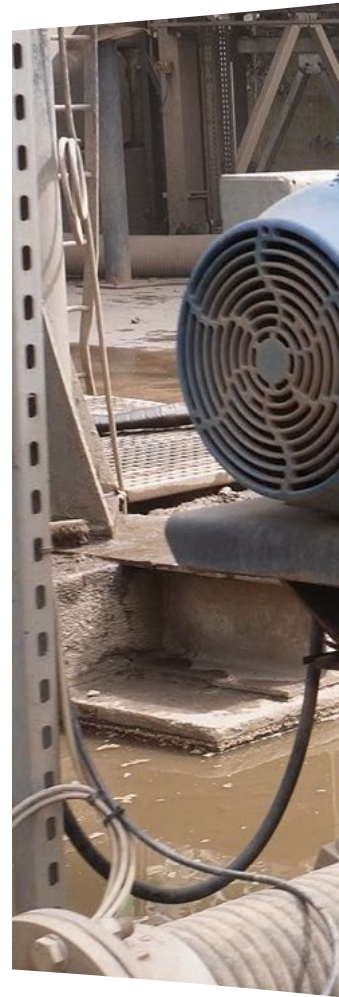

- Understand your needs & requirements
- Provide advice on TOTEX
- Reduce downtime and operational efficiencies
- Responsive

# Sustainability

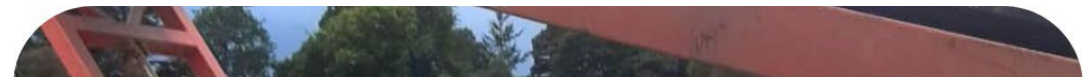

We drive sustainability through efficiency, taking accountability for the environment, people and the economy.

# Our Products

## AUDEX

Audex manufacture dewatering pumps for dirty water, mud sludge, and abrasive slurries.

The pumps run fully submerged in sumps, wedge pits or open-water lagoons.

## SLURRYPRO<sup>®</sup>

SlurryPro manufacture centrifugal slurry pumps for abrasive slurries.

The range is optimised for longer wear-life, reduced downtime, and lower operating cost.

**LSM**

LSM Pumps manufacture heavy-duty peristaltic pumps for difficult sludge duties.

High solids, high density, semi-dry, or shear-sensitive – LSM pumps just keep rolling.

Developed for improved wear-life, energy efficiency, and ease of maintenance, Toro provide a better pump for niche process fluids.

# EnviroHub

EnviroHub is a modular, water test and treat system for silt, turbidity, pollution removal and pH correction.

EnviroHub is supported by Senteos – a cloud-based answer for monitoring and recording data 24/7.

# Meet the Team

## Board of Directors

**Andy Smith**  
Managing Director

**Nathan Rowles**  
Sales Director

**Ed Smith**  
Operations Director

**Bill Noakes**  
Finance Director

## Senior Leadership Team & Leads

**Lee Cass**  
Operations Manager

**Daniel Hughes**  
Head of Sales

**Joseph Ball**  
Head of Technical

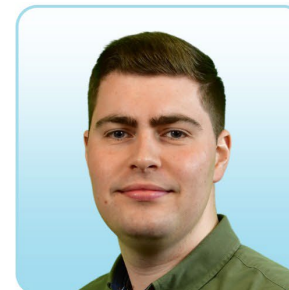

**Roger McCreadie**  
Head of Engineering

**Sam Damon**  
Head of Marketing

**Mark McCreadie**  
Water Lead

**Deryck Harmer**  
Project Lead

**Fergus Pridham**  
Heavy Industry Lead
